

## PRECISION POWER FOR PERSISTENT WEEDS

**PMRA REG. NUMBER**  
35853

**ACTIVE INGREDIENT**  
Fluroxypyr 333 g/L

**FORMULATION**  
Emulsifiable  
Concentrate

**HRAC NUMBER**  
4

**SIGNAL WORD**  
DANGER: POISON

**RE-ENTRY INTERVAL**  
12 hours

**PACKAGE SIZE**  
2 × 9.6 L jugs/case

**RESTRICTED USE**  
No

Dexvor™ 333 EC delivers powerful, control of tough broadleaf weeds like cleavers, kochia, and wild buckwheat. With proven crop safety and flexible tank-mix options, it helps growers manage resistance and keep cereal acres clean.

- Flexible tank-mix partner
- Supports resistance management strategies
- Effective on tough weeds, including Group 2-resistant kochia

### KEY CROPS

WHEAT

BARLEY

OATS

### KEY WEEDS CONTROLLED OR SUPPRESSED

TARGET  
BROADLEAF  
WEEDS

- Chickweed
- Cleavers
- Hempnettle
- Kochia
- Round-leaved mallow
- Stork's-bill
- Volunteer flax
- Wild buckwheat

### WATER VOLUME

**GROUND:** Minimum of 6 GAL/AC or 27.3 L/HA

**AERIAL:** Minimum of 3 GAL/AC or 13.65 L/AC

**APPLICATION INFORMATION**

Apply Dexvor 333 EC post-emergence to spring cereals from the 2-leaf stage up to early flag-leaf (shot blade). For winter wheat, apply in the spring from the 3-tiller stage to just before flag-leaf emergence. Treat when weeds are small and actively growing. Best results are obtained from applications made to seedling weeds.

Apply with ground or aerial application equipment (reference the product label for directions) for post-emergent control of cleavers and kochia, including ALS resistant kochia and other broadleaved weeds.

**RAINFAST:** Within 1 hour after application.

**WEEDS CONTROLLED**

KEY WEEDS	LEAF STAGE	RATE (ML/ACRE)
<b>CLEAVERS</b>	1-8 whorl	125
<b>KOCHIA*</b>	2-8 leaf	125
<b>ROUND-LEAVED MALLOW</b>	1-6 leaf	166
<b>CHICKWEED*</b>	up to 8 cm	166

\* Includes biotypes resistant to Group 2 herbicides (ALS inhibitors).

**TANK-MIX INFORMATION**

For consistent broadleaf control, apply Dexvor 333 EC in tank-mix with another registered broadleaf partner such as 2,4-D Ester, MCPA Ester, or Clopyralid + MCPA.

Always follow the most restrictive label directions of the tank-mix partner.
